Dear Naresh,

Article seventy two of this book says "**A word spoken with full care and interest can never be tiring or boring.**"

This is exactly what can be said about your book. **'Everyday's inspiration for Students.'** Each thought is fruit of your reflection. Hence it is spoken with care and interest. Anything done with care and interest specially for children will bear fruit. Most of your thoughts are for students and teachers. Both groups are very receptive.

By inspiring students you are helping to build the nation. Our children are our future. That many may benefit from this book is my prayer.

Good-bless you

Sister Flavian
Ex Principal
Carmel Junior College,
Sonari, Jamshedpur

*Success should be judged
by oneself, it is secondary
whether others admire it
or not.*

***K**nowledge always
purifies one's previous
knowledge.*

***C**lean mind always drives
out the undesirable and
unnecessary thoughts
before they permanently
settle in our memory.*

*A good mind is always
eager to learn but stores
away only the useful
things inside.*

*The words used in a
proper way are divine,
otherwise devilish.*

***I** is always better to
take a clearly visible
path leaving others aside.*

***D**iscipline should be
formed as per needs of
the school and students
otherwise it will be
an indigestible food.*

*Things once understood
clearly can never
be forgotten.*

***K**nowledge is always
pure and complete. It is
our problem if we
can't express it well.*

***K**nowledge is transferred
through the mind,
not through hands.*

***E**ducation is the
only means by which
people can live peacefully.*

*A person who has missed
the opportunity of getting
educated has missed
everything in his life.*

***P**unctuallity forms a
system in us, by which
we can utilize maximum
amount of our time.*

*To realise one's mistakes
is a sign of courage and
compromising with them
is foolishness.*

*A watch reminds us
of how much time we
have already lost and how
much more still to lose
or utilize.*

***P**ersonal tuition is an
addiction from which
every child wants relief.
He feels proud of himself
if he achieves something
on his own.*

***G**reed of money is liked
by some but greed for
knowledge is liked by all.*

Every school has got a character of its own which gets reflected in the character of its students.

A good school creates a continuous flow of knowledge, which never ends and never stops.

A student who does well in his studies gets respect first from himself, then from his friends and his school and finally from his parents.

*School is the only place
where people are judged
by their knowledge,
not by their money.*

*A teacher should not
impose his/her own
personality on the students
but he/she should bring
out the personality of
each and every student in
its original form.*

***K**nowledge given to
others gets multiplied.*

C***ompetitive tension
among students is not
good and it must be
replaced by a bond
of co-operation.***

*Teachers are like a
stream which continuously
carries the knowledge;
students collect knowledge
out of it and make
it available to everyone.*

How sad are those who have not got educated, how sad are those who have not utilized their education. How sad are those who use their knowledge in destroying humanity and how sad is the school, that has produced such students!

***I**maginative power
Appearing in students
is a clear sign that they
are on the right path.*

*Leading comes first,
learning next and wisdom
is the final goal for
all students*

***C**hildren cannot love
You on their own but
when you start loving
them, they too
will love you.*

*A student's soul should
always be hungry for
knowledge through
books, teachers or from
others. Their search
should never end.*

*A child joins the school
in a state of complete
darkness but when he
comes out, he has the
light of wisdom to remove
others darkness.*

***One can not say that
one student is better or the
other is worse.***

***It is only the quality of
nourishment that makes
all the difference.***

***D**iscipline should not
be imposed instead it
should come as an
impulse and not as a rule.*

When a student learns something which is beyond his imagination it automatically leads to a great respect towards teachers and finally to the school.

*A school is the dream
of one, its birth an
enterprise of a few to be
used by thousands and
benefited by a whole
generation.*

***A** school is a source to
feed the Nation with its
beautiful flowers which it
produces all around
the year.*

O*besity and sloth are
two great enemies of
knowledge, which can be
done away with regular
sports activities in schools.*

***B**y prescribing uniform
for all students, a school
pledges to treat every
student on equal footing
without any partiality.*

***D**iscipline imposed
through force is only a
punishment given prior
to ones mistake.*

*A person who is self
motivated is self
disciplined.*

***H**unger for learning
comes through interest
and interest comes
through proper way
of teaching.*

*Teaching is a path
illuminated by teachers and
followed by students.*

***S**tudents are a working
force of youth, talent and
will, combined into one.*

*The students express
the ambition of their
parents, school, teachers
and finally their own.*

*To try is to get
things done.*

The students are like seeds whose original nature, character and instinct can not be changed but it is always possible to get the best out of it.

Every lesson has got a special message within and it should be very clearly understood by students otherwise it will be wastage of time.

*A word written by a
precious pen has no
value until and unless
there is some precious
meaning behind it.*

***E**ducation is like a
candle once lighted will
give light to all.*

A student failed in one class is like a rusted car which can be repaired and made new.

***E**ducation is the first
thing parents think of
after the birth of the child.*

*That teacher is great
who performs his duty for
the benefit of students
alone, not his own.*

***E**ducation or teaching
is not a light in itself
but a means which guides
us as to how to use our
own inner light.*

*Teaching is a worship
and in no way should
it be influenced by money.
If such an interest creeps
in it will spoil many a
student for the profit
of one.*

***E**go is the peak of a
mountain from which
everyone comes down.*

*A student is always in
the need of a sailor who
can sail his boat through
towards the ocean of
knowledge.*

The sun gives light to a school from all angles from morning to evening, so that there is no place left without light; a good teacher also does the same while teaching.

*Nobody can conquer the
knowledge; one can take
it only by bowing down.*

***Y**our success is always
judged by a successful
person.*

*Patience alone can
conquer time.*

*Heart of children is like
the flame of a candle
which requires two
Affectionate hands to hold
and protect the light in
between.*

***P**rayers are beautiful
songs of the heaven,
which God listens to,
because they are
for him only.*

*A prayer in the morning
is our wish Addressed to
God and in the evening
our thanks to him for what
he has given to us.*

***A** t school, students learn to use only a small portion of their brain but still this has great value because through this they learn to use the rest of their brain.*

***P**olitics in school is like
rust in the body.*

*Words are like flowers
and it depends upon us
how beautiful a garland
we make out of it.*

The mind of a child is very sensitive. Knowledge should be poured into it very slowly otherwise it will become a devils mind in the long run.

Prayers express the strong will of performing our duties in the most sincere way. A prayer done by an insincere person is only an expression of his greed.

School bell is an alarm
calling attention and
alertness towards studies
and it is a force which
automatically drives
students to put head
into their work.

Conversation can be
*effective only when you
speak what others want
to listen.*

***A** word spoken with
full care and interest can
never be tiring or boring.*

*One should be active like
water, dynamic like the
sea and aggressive like a
warrior.*
